CENSUS 2000 BLOCK MAP

 (2KGUAIR) 42733550050000000000

This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. Tribal census tracts are defined by a tribal government or a county or tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservations or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if the constituent tribal group is the same, the tribal number is repeated.
